

# ST4950

## Long Battery Life GPS Tracker for Assets, Trailers, Equipment

High Capacity Rechargeable Battery

Solar panel

Extremely low power consumption

Waterproof compliant IP67

## Characteristics

\***Rechargeable battery** (Long battery life. In average 8 weeks depending on the location update interval).

\***Real Time Tracking** and **tracking history**

\*Track from any computer, tablet or phone or just download our **Android** or **iOS App: Americaloc Viewer**

\***E-mail or SMS alerts:**

- Movement
- Stops
- Device on/off
- Low battery
- Entering or leaving zones
- Power connection/disconnection

\*This tracker has a **built-in solar panel** to extend its battery life if enough sunlight is received. Using the solar panel is **not mandatory**, you can still use the tracker as a traditional battery operated GPS tracker. **You can even wire it if you need it.**

**One hour of direct sunlight** should provide enough power to transmit **9 locations**.

\* **Fully configurable online.** You can configure the unit so the reporting interval automatically changes according to the status of the unit: **motion/stationary/wired/not wired** .

\***Newest version that works on the modern CAT M1** networks intended for IoT (Internet of things).

## Included Accessories

Wall charger

Magnetic holder.

\* **Optional accessory:** *hard wiring kit for permanent installation in vehicles.*

## Dimensions

3.78"  
96 mm

5.12"  
130 mm

1.63"  
41 mm
